AN tÚDARÁS um ARD-OIDEACHAS

Important Notice

The Higher Education Authority (HEA) makes this document available to course Providers who wish to submit a proposal(s) for higher education and training courses as part of Springboard+ 2019. The document must not be used for any other purpose. Springboard+ is managed by the HEA on behalf of the Department of Education and Skills.

The HEA has taken all reasonable care to ensure that the information set out in this Call for Proposals is true and accurate in all material respects as at the time of publication. However, no warranty or representation is given as to the accuracy or completeness of this material. The HEA does not accept any liability or responsibility for the accuracy, adequacy or completeness of the information set out herein.

The HEA will not be liable or responsible for any opinion, statement, or conclusion contained in, or any omission from this document or for any other written or oral communication made available during the course of the Call process. No representation or warranty is made in respect of such statements, opinions or conclusions.

The HEA reserves the right to amend these documents and any information contained herein at any time by notice in writing to the candidates.

None of the information set out herein will constitute a contract, or part of a contract, or an offer to enter into a contract, between the HEA and any provider. Nothing in these documents is, nor shall be relied upon as, a promise or representation as to the HEA's ultimate decision in relation to the award of the contract for the services.

However, the HEA reserves the right to take such steps as it considers appropriate, including but not limited to: changing the basis of, or the procedures (including the timetable) relating to, the Call process; rejecting any, or all, of the proposals; abandoning the competition (or any part of it) at any time prior to a formal written contract being executed by and on behalf of the HEA; procuring the services by alternative means if it appears that the services can be more advantageously procured.

No legal relationship or other obligation shall arise between any applicant and the HEA unless and until a contract has been entered into.

Each applicant's acceptance of delivery of the Call for Proposals constitutes its agreement to, and acceptance of, its terms.

Under no circumstances will the HEA be liable for any costs, charges or expenses incurred by candidates as a result of participating in this Call process, however caused. Any costs associated with the submission of a proposal are the sole responsibility of the candidate and will not be reimbursed.

Statutory requirements

All Providers making a proposal(s) for courses to be supported via Springboard+ must confirm compliance with statutory requirements regarding their financial and legal status and be prepared to furnish any additional supporting documents as requested by the HEA.

Springboard+ 2019

Introduction

Springboard+ began in 2011 as part of the Government's Jobs Initiative. It has provided free upskilling in higher education in areas of identified skills need, with a particular emphasis on upskilling of people who are unemployed.

Springboard+ complements the core State-funded education and training system and is one of a number of initiatives designed to support people back into employment and to build the supply of skilled graduates for vacancies arising across key sectors of the economy. A Department of Social Protection scan of the Live Register carried out in July 2018 reported that 80% of Springboard+ participants (2011 – 2016) were no longer on the Live Register. In addition, 7% of graduates for whom an employment outcome has been reported are now self-employed. <https://springboardcourses.ie/pdfs/An-Evaluation-of-Springboard+-2011-16.pdf>.

Springboard+ is managed by the Higher Education Authority (HEA) on behalf of the Department of Education and Skills. An evaluation framework underpins the initiative, with ongoing monitoring of its impact. All of the evaluation reports are accessible via www.springboardcourses.ie.

Springboard+ forms part of the Government's Action Plan for Jobs, Action Plan for Education and the National Skills Strategy, which aims to increase the number of people in employment to 2.1m by 2020. The programme is funded through the National Training Fund and the ESF Programme for Employability, Inclusion and Learning (PEIL) 2014-2020.

In light of the positive indicators on employment growth, and the continuing fall in the level of unemployment, a number of changes implemented for Springboard+ 2018 have been retained with a number of further amendments. These changes will aim to ensure that the initiative continues to play a key role in developing work-ready graduates who are equipped to meet skill needs in growth sectors of the economy.

1. Overview of Springboard+ 2019

- All sectors of the economy *with a demonstrated skills shortage* are included.
- All courses are open to people irrespective of their employment status.
- In courses (except ICT skills conversion courses) where eligible applicants are a mix of all applicant categories, as outlined in the box below, applicant categories 1 and 2 should form a minimum of 30% of the student cohort, where possible.
- For employed participants on courses NFQ L7-9, HEA will fund 90% of the course fee, with Providers collecting the remaining 10% from participants.
- Level 6 courses are free to all eligible participants.
- **The restriction on moving from one discipline area to another has been removed.**
- **The requirement to move up the NFQ ladder has been removed.**

2. Changes to Springboard+ 2019 Potential Applicants

This year represents the eighth phase of Springboard+. When the initiative was first introduced in January 2011 unemployment was at 15%, with over 400,000 people out of work. However, unemployment is less than half that in 2011, with the CSO reporting 5.3% for December 2018¹. With this in mind, Springboard+ in 2019 will continue to have a dual focus of upskilling and reskilling people who remain out of the workforce (activation) and also a focus on upskilling those in employment (workforce development). The further development of skilled workers remains central to our ability to attract ongoing Foreign Direct Investment (FDI) and the further development of our Small Medium Enterprise (SME) sector.

In developing courses, Providers should be cognisant of four areas which have been deemed by government as being of critical importance at this time: digital skills, transversal skills, management and leadership skills and the workplace of the future. All applications should address one or more of these areas.

The eligible applicants for Springboard+ 2019 are as follows (*See section 4 for further information on eligibility criteria*):

- | |
|---|
| <ol style="list-style-type: none">1. Those in receipt of an eligible payment from the Department of Employment Affairs and Social Protection, and the formerly self-employed. |
|---|

¹ <https://www.cso.ie/en/releasesandpublications/er/mue/monthlyunemploymentdecember2018/>

2. People not in receipt of a payment from the Department of Employment Affairs and Social Protection that have been out of the work environment for a number of years due to childcare or other caring obligations and have a previous history of employment but may require upskilling or reskilling to transition back to the workforce (“Returners”).
3. People in employment who wish to upskill or reskill to meet a specific emerging skills gap to prepare them for the future of work..

In a recent economic forecast the Economic and Social Research Institute (ESRI) estimated that Ireland will be close to full employment by end-2019 with 2.35 million people in employment.² The rates of engagement with Life-long Learning (LLL) have been increasing over recent years. In Ireland 14% of those in employment are engaged in LLL compared to a European average of 10.9%. To assist in improving this position and aligned with the priority of further developing work-ready graduates, Springboard+ is building on the changes made in 2018 to further expand the programme in 2019.

Therefore Springboard+ 2019 will:

- Continue to prioritise national skills requirements in growth sectors of the economy. Furthermore, courses proposed in *all skills categories* will be considered where strong and clear evidence of a regional or national need is articulated with evidenced enterprise support. Key areas to consider in this regard are digital skills, transversal skills, management and leadership skills and the workplace of the future.
- Prioritise those in receipt of a social protection payment and returners to upskill or reskill and re-enter the workforce by providing places free of charge. Therefore, 30% of places approved will be ring-fenced for these applicants based on the 2018 applicant data and assuming full employment in 2019.
- Increasingly target the upskilling and reskilling requirements of those in employment and in particular those that are under-employed or whose job could become obsolete due to technological advances. Places will be provided free of charge at Level 6 and a

² <https://www.esri.ie/pubs/QEC2018AUT.pdf>

contribution of 10% of the course fee will be sought from Level 7-9 participants who are in employment (payable by the participant or the employer to the course Provider). Please note that in future financial audits HEA will check that the fee has been sought and paid by employed participants.

- Remove the restriction on the movement from one discipline area to another to pursue a course.
- Remove the requirement for participants to move up the National Framework for Qualifications ladder. This means that participants may take a second course for example at Level 7 in a different skills area.

Proposals invited:

This Call invites proposals for

1. Part-time higher education courses, Levels 6-9, and/or
2. Proposals for Level 8 ICT skills conversion courses both full and part-time.

Appendices

Appendix 1 provides a list of relevant reports on current and future skills needs. Supporting information on the development of ICT skills conversion courses is provided in a separate document. Appendix 2 outlines the ISCED codes for international classification of academic disciplines, which will be used on Skills Direct when Providers are making submissions. Appendix 3 outlines the marking scheme which will be used by the Expert Panel. Appendix 4 provides a template for support of applications from the Regional Skills Fora Managers. Finally, Appendix 5 provides a template for the QQI to certify their approval of courses.

Providers who wish to make Springboard+ course proposals must submit their proposals online via <http://skillsdirect.heai.ie>. The deadline for submissions is **13.00hrs on Monday 25th February 2019**.

3. Information to assist Providers in making proposals

3.1 Objectives of Springboard+

The primary objective of Springboard+ in 2019 is to provide upskilling and reskilling courses to develop the talent base in Ireland in key growth sectors of the economy. Providers should be cognisant of the data and trends on national and regional skills shortages in expanding enterprise areas and submit proposals which are evidence-based. Courses can include, **but are not limited to**, ICT, biopharma, medical device technologies and manufacturing, financial services, hospitality and entrepreneurship. **Providers should, where relevant, be cognisant of the impact of Brexit, in particular any arising skill needs as a consequence of developments. They should also be mindful of the changes on the horizon due to the developments in technology and how this will impact on the future of how we work.**

There are four additional specific objectives of the programme;

- Helping those who are unemployed, formerly self-employed and Returners to return to sustainable employment. To this end in developing proposals, Providers are expected to have regard to the most recent data and trends on the profile of people experiencing unemployment.
- Provide opportunities for workforce development to enhance the skill levels of those already in employment; to increase the national rate of engagement in Life Long Learning; to reskill those whose current occupation may be at risk from technological and other developments. The four areas of digital skills, transversal skills, management and leadership skills and the workplace of the future will be significant principles to be addressed under this objective.
- Enhance collaboration between enterprise and higher education to design and deliver relevant higher education courses that support job creation and expansion in line with the Government's Action Plans for Jobs, National Skills Strategy and Action Plan for Education.
- Enhance the skills profile of the labour force to meet the targets and objectives

of the Action Plan for Jobs, the Action Plan for Education, the National Skills Strategy, the ICT Skills Action Plan, Languages Connect and other skills reports as outlined in Appendix 1.

3.2 Labour market trends

The seasonally adjusted number of persons unemployed was 127,100 in December 2018, relating to an adjusted unemployment rate of 5.4%^[1], down from 6.6% in September 2017.

3.3 Springboard+ target applicants

The target applicants identified for Springboard+ 2019 are:

1. *Those in receipt of an eligible payment from the Department of Employment Affairs and Social Protection*

- who already hold a National Framework of Qualifications (NFQ) award at Level 5 or 6 or equivalent, with a previous history of employment; or
- with a previous history of employment who already hold a higher-level qualification at NFQ Levels 6 to 9, who may require additional upskilling or reskilling in order to re-enter employment.

2. *Previously self-employed*

- people at all qualifications level who may require new qualifications to return to self-employment or to enter employment.

3. *Returners*

- who already hold an NFQ award at Level 5 or 6 or equivalent, with a previous history of employment; or
- with a previous history of employment who already hold a higher-level qualification at NFQ Levels 6 to 9, who may require additional upskilling or reskilling in order to re-enter employment.

4. *Those in employment*

- wishing to upskill or reskill to meet required skill needs across a range of sectors.

^[1] <https://www.cso.ie/en/releasesandpublications/er/mue/monthlyunemploymentdecember2018/>

Places will be provided free of charge to those participants from categories 1-3 above. In the case of category 4, Level 6 courses remain free and a contribution of 10% of the cost of the place will be collected by the provider for Level 7-9 courses. This contribution can be paid by the participant or the employer. The HEA will fund the remaining 90% of the cost directly to the Providers.

3.4 Target participants for ICT skills conversion courses

Courses both full and part time are available to applicants that have a Level 8 qualification in a cognate discipline, as well as the capacity and underlying aptitude to undergo an intensive programme of study and work-experience to acquire industry-relevant ICT and software development skills at Level 8 of the National Framework of Qualifications (NFQ). In the case of the one-year full-time ICT skills conversion courses, persons meeting the entry criteria are eligible regardless of employment status. **Those in receipt of jobseeker's payments are not eligible for the two-year part-time ICT skills conversion courses.** Please see the eligibility criteria on www.springboardcourses.ie for further details.

Given the positive trends in the rate of employment and the ESRI prediction for full employment later in 2019, it is anticipated that in 2019/20 academic year demand will continue to be greater for two-year part time ICT skills conversion courses, with an anticipated consequential decrease in demand for the full time one-year option. **This will be factored into the assessment process of these programmes.**

4 Applicant eligibility

Please note the following which applies to all 2019 applicants:

- Participants may not enroll in more than three courses in any five-year period. They may re-engage with the Springboard+ programme after a break period of two years. This criteria will be strictly enforced.
- Participants who enrolled in **more than one Springboard+** course since the inception of Springboard in 2011, and **did not complete** any course, are **not eligible** to apply in 2019. This criteria applies to all categories of applicant outlined below.
- Participants who enrolled in **just one course**, since the inception of Springboard+ in 2011, but did not complete, **are eligible to apply** in 2019.
- All applicants must meet the eligibility criteria outlined below and any additional requirements as outlined by the course provider.

a) Those in receipt of an eligible payment from the Department of Employment Affairs and Social Protection (DEASP) and the formerly self-employed

To be eligible for a Springboard+ part-time course, a person must be in receipt of an eligible DEASP payment or be signing for social insurance contribution credits and have a previous history of employment or self-employment and be actively seeking work. Information on eligibility criteria regarding DEASP payments is available on www.springboardcourses.ie

b) Returners

Returners seeking to apply in 2019 will be required to verify their status as a returner. This will include providing a letter/statement signed by a Commissioner for Oaths confirming their current status. It should be noted that acceptance on to a Springboard+ course does not confer any entitlement to DEASP payments or childcare supports.

c) Those in employment

This category of applicant will be required to provide a copy of their most recent P60 or other relevant revenue documentation or a letter from their current employer to confirm

employment or self-employment.

Returners and employed participants will be required to meet the residency requirements for Springboard+; that they must have been ordinarily resident in an EU/EEA/Swiss state for at least three of the five years preceding their entry to their course.

It is important to note that as in previous years, no participant on a Springboard+ course in 2019 will be eligible for support under the Department of Education and Skills Higher Education Grants Scheme.

4.1 Participants who return to employment

As one of the objectives of Springboard+ is to support upskilling of the labour force, participants who succeed in re-entering employment before completion of a course should be facilitated to gain the course award. In planning courses, Providers should ensure that participants who return to employment have a reasonable opportunity to complete the course on a flexible basis. Such participants will not be required to pay any fees to complete their course.

4.2 Priority of eligible participants

While the initiative is building on the changes made in 2018 in respect of the eligible cohorts, it should be noted as follows;

HEA will expect that when Providers are making decisions on the awarding of places to eligible applicants on these courses, in instances where two candidates meet the course academic admissions criteria, priority must be afforded to the unemployed / Returner applicant over those who are already in employment in every instance. Consideration should also be given to those who have not previously undertaken a Springboard+ course.

In courses (except ICT skills conversion courses) where eligible applicants are a mix of all applicant categories, as outlined in Section 2, applicant categories 1 and 2 should form a minimum of 30% of the student cohort. In instances where there may be fewer eligible applicants from categories 1 and 2 it is acknowledged that the 30% threshold may not be possible. In such circumstances Providers can consult with the HEA.

5 Types of courses which will be supported via Springboard+ 2019

Funding will be available for

- I. part-time higher education courses **up to a maximum of 12 months** in duration
- II. one year full-time and two-year part-time ICT Skills Conversion courses (NFQ Level 8)

Regarding part-time courses, Providers should note that for a course to be deemed part-time within Springboard+ **it cannot provide for more than 17 class contact hours per week.** This facilitates participants continuing to seek employment and therefore receive a job-seekers payment, and those already in employment. It is important that proposed attendance patterns, including timing of classes/lectures for programmes facilitate these requirements. Proposals submitted must provide details of attendance arrangements to enable full clarification that they meet the contact hours' requirement.

Please note the following:

- Courses in all areas of demonstrated skills needs are eligible, particularly including new and emerging skills areas. However, all proposals must be evidence-based.
- **For the purposes of this Call, the term 'part-time' is intended to cover all forms of flexible delivery including those offered partially during the day or in the evenings/weekends or those with an online and/or distance component. Given the emphasis on upskilling people in employment in Springboard+ 2019 Providers should be cognisant of the fact that many participants will be unable to attend classes during regular business hours of 9-5pm, Monday to Friday. Therefore, it is expected that courses will be proposed on the basis of flexible provision and/or at times of the week and weekend that suit the needs of learners in employment. If Providers are targeting Returners as an eligible cohort for a course the provision should reflect this with classes being provided during school hours. This will be factored into the assessment process of these programmes.**
- As per 2018, ICT skills conversion courses are sought on a one-year full-time *and* two-year part-time basis. However, as noted in section 3.4 above, given the current

positive employment trends it is anticipated that in 2019/20 academic year demand will be greater for two-year part time ICT skills conversion courses, with an anticipated consequential decrease in demand for the full time one-year option. **This will be factored into the assessment process of these programmes.**

- Courses being submitted for 2019 should be stand-alone programmes that upskill participants for the labour market upon completion. For example, courses that are year one of a course that requires a participant to do a second year of a course are not being sought (with exception of two-year ICT skills conversion courses).
- As referenced earlier in the Call when developing courses Providers should be aware of the need to develop courses that address digital skills, transversal skills, management and leadership skills and the workplace of the future.
- Standard full-time courses in higher education will **not be** eligible for Springboard+ funding.
- For ICT skills conversion courses, eligibility for the two-year part-time option will continue to be confined to those who are not in receipt of an eligible DEASP social protection income that has job-seeking conditionality, as the Part Time Education Option (PTEO) payment will not be available to participants on the two-year course. Eligibility for the full-time course has not changed and will continue to cater for both the unemployed, Returners, the employed and those currently or formerly self-employed.
- Proposed Springboard+ full-time courses (with the exception of the ICT skills conversion course) are not eligible for funding.
- Part-time course proposals which lead to an award of fewer than 10 ECTS credits or equivalent per annum will not be considered.
- Full-time ICT skills conversion proposals leading to awards of fewer than 60 ECTS credits per annum **will not** be considered for funding.
- Likewise, two-year part-time ICT skills conversion course must lead to an award of at least 60 ECTS credits in total.
- ICT skills conversion courses that provide 'multi-stream' options should provide evidence of previous interest from applicants and enrolment patterns to justify a 'multi-stream' approach.
- Courses at Level 6 in a defined advancement to Level 7 will be particularly welcome under Springboard+ 2019.

5.1 Job readiness and work placement

Courses must include a dedicated job readiness/job preparation component (i.e. distinct and specific credited module(s) on enhancing job readiness). Details of this provision will be required as part of course proposals. It should be noted that participants on reskilling courses may require a dedicated job readiness component on their course to facilitate their transition into a new area of employment.

Course proposals should also include plans for work placement. Almost 85% of Springboard+ courses approved (excluding those in the Entrepreneurship skills category) in 2018 included a work placement, or college project. Where a Springboard+ course is a mixture of those in employment, Returners and those in receipt of a social protection payment, it is accepted that a work placement may not be required for a participant who is in employment. However, if a work placement is sought or deemed suitable for a participant in employment this is encouraged. In the case of participants who are Returners or unemployed, a work placement or project based credited module should be provided.

A work placement is mandatory for 1-year full-time ICT skills conversion programmes and a work placement or credit bearing project is required for the 2-year part-time ICT skills conversion programme.

5.2 Current and future skills needs of enterprise

To be considered eligible for approval, Springboard+ courses must seek to address an identified current, or future, skills need and include a precise labour market rationale. Springboard+ course proposals may focus on development or conversion of relevant technical skills and knowledge, to develop transversal skills that will put participants in the best possible position to attain sustainable employment or return to self-employment.

To assist potential Providers, a list of recent reports on national skill needs is provided in Appendix 1. The aim of Springboard+ is to upskill individuals to meet demonstrated skills needs and **is not** to provide bespoke training programmes for a specific company / employer.

A separate document, *Additional information on ICT skills conversion courses*, provides further detailed information to support course proposals in this area.

It is important to note that proposals submitted by Providers should:

- Be flexible and innovative in the provision proposed to ensure the best possible opportunity for potential applicants to participate in Springboard+, particularly in the context of upskilling for those in employment.
- Be nationally or regionally focussed.
- Demonstrate clear evidence of engagement with enterprise/industry partners and Regional Skills Fora Managers in the development of the programme. The Regional Skills Fora Managers will be required to complete a template outlining their support for individual courses. Please see Appendix 5. For example, evidence of co-operation with industry on course design, guest lectures from industry, work placements etc. *Note that generic/pro forma letters of support from industry are not deemed sufficient evidence of engagement with industry.*
- Include plans for work placements or credit-bearing projects as appropriate to the participant.
- Demonstrate that there is an available supply of applicants.
- Include career guidance as part of the course delivery, where applicable.

In addition, Providers will be expected to supplement the information provided in this document on skills demand through direct engagement with local and regional employers, and with representative organisations such as Ibec, Chambers of Commerce, ISME; with enterprise development agencies such as Enterprise Ireland, IDA Ireland and the City and County Enterprise Boards.

5.3 Eligible NFQ award types

Eligible courses must either:

(a) Lead to a higher education and training award that is included in the National Framework of Qualifications (NFQ) at Levels 6 to 9, which is made by one of the following Irish awarding bodies:

- Technological University Dublin (TUD),

- Quality and Qualifications Ireland (QQI), including combinations of modules from already validated programmes leading to a major award. (*Important: Combinations should be submitted to QQI for approval prior to or at the same time as submission to Springboard to ensure adequate time for validation – see note in box below*)
- Institutes of Technology with delegated authority to make awards,
- Royal College of Surgeons in Ireland,
- Universities,

or

(b) Lead to a higher education and training award that is a comparable award based on recognition advice available from QQI.

Collaborative proposals from two or more Providers will be considered for funding, including those who form part of regional clusters in higher education, where a skill need in a particular sector has been identified. A lead provider must, however, be clearly identified as part of the proposal and the proposal must adhere to all requirements regarding quality assurance and the making of awards. They will be responsible for the financial management and reporting of the programme.

As part of course proposals, Providers will be required to set out the teaching, learning and assessment methodologies that will be used to meet learner needs, including flexible approaches; practical application of learning; and study skills/return to learning components. Academic and student supports should also be referenced, including details of job readiness training and, where relevant, work placement/internship supports. Regarding entry and achievement of an award, it is expected that proactive Recognition of Prior Learning (RPL) will be used by course Providers. Details of each provider's policy in this area will be required as part of course proposals. Arrangements to promote and raise awareness of Springboard+ course opportunities will also be required.

Important note for courses requiring validation by Quality and Qualifications Ireland (QQI)

- Springboard+ funding will be subject to the proposed course being validated by QQI.
- Springboard+ courses leading to QQI awards must be validated before any learners are enrolled.
- The QQI validation process and criteria for proposed Springboard+ courses will be the same as for other kinds of programmes. This is to ensure that Springboard+ courses are of a comparable quality. Validation will normally be for **five years**.
- Applications for validation must be submitted to QQI before proposed Springboard+ courses are marketed. Proposed programmes may be marketed to learners before determination of the application for validation but following acceptance by QQI of a completed application as long as it is made clear that the programmes are offered subject to being validated by QQI.
- The current version of the Programme Validation Manual for Programmes of HET and Apprenticeships (FET and HET) should be used for preparing applications.
- **Proposed Springboard Courses must be submitted to QQI for validation in advance of submissions to Springboard+ for funding.** This is to ensure adequate time for the QQI validation process to be completed as this can take up to 25 weeks though it will be expedited by QQI. For programmes that are designed exclusively for Springboard+ purposes, while initial screening of the submission may take place, QQI will only proceed with the validation process after they have been approved for Springboard funding.
- **A template has been provided to confirm that courses have been validated by the QQI. This must be completed by 1st September 2019.**
- Written evidence that the course has received QQI validation must be submitted within 10 days of receipt of same from the QQI.

Application and Evaluation Process

6.1 Costs and fees

Providers are requested to submit details of all costs associated with the delivery of proposals in the format outlined in Section 5 of the online proposals system <http://skillsdirect.heai.ie>. Funding to successful Providers will be on the basis of the course fee by reference to the number of credits to be provided. As mentioned in section 3.3, for participants who are in employment HEA will fund 90% of the course fee, with the Provider receiving the balance from the participant (or her/his employer). The marks allocated in Section 5 on the value for money of a course will be competitive and will be made with reference to average costs in previous years across the same skills areas and at the same NFQ Levels. Funding will be released in a number of tranches depending on the course duration, numbers of students enrolled/registered and having regard to procedures in place for Protection for Enrolled Learners (where appropriate).

6.2 Data requirements and evaluation

GDPR

Springboard+ is co-financed by the Department of Education and Skills and the European Social Fund (ESF) as part of the Programme for Employability, Inclusion and Learning (PEIL) 2014-2020. The data provided with applications for Springboard funding will be collected, processed and retained by the HEA in accordance with its obligations under the Common Provisions Regulation (EU) 1303/2013, the European Social Fund (EU) Regulation 1304/2014, and related delegated and implementing regulations (henceforth the “ESF Regulations”). The HEA and the Department of Education and Skills are Joint Data Controllers in respect of the data you provide and will only process that data in accordance with the GDPR and their legal obligations under the ESF Regulations referred to above. Personal data collected as part of applications will be shared with the Department of Education and Skills for the purposes of monitoring, evaluating, managing, verifying and auditing the implementation of Springboard+. Such data may also, from time to time, be shared with the European Commission, the European Court of Auditors, Central Statistics Office and/or their agents for audit and verification purposes. Data will only be retained by the Joint Data Controllers for the period required to fulfil their obligations under the ESF Regulations. Under the GDPR, data subjects have the right to request from the data controller access to their data, the right to request

rectification or erasure of their data, the right to request that the processing of such data is restricted, and the right to data portability. Any such requests should be addressed to Mary Farrelly, Data Protection Officer in the HEA at dataprotection@hea.ie

Course Providers will be required to promptly return data to the HEA on course activity and outcomes, and co-operate with ongoing monitoring and evaluation, including all ESF reporting requirements, which is managed by the HEA in consultation with the Department of Education and Skills. Requirements will include maintaining a student record for each Springboard+ participant; collecting evidence that verifies eligibility of the applicant; and linking input data (education, employment history) with outcomes data (course completion, award, and employment by sector). Further details will be supplied as part of contract terms. Funding of courses will be conditional on co-operation with all aspects of the evaluation process and timely return of data, including requirements under the ESF co-financing arrangements as stipulated below.

Note: It is imperative that any material provided by applicants to confirm their eligibility for a programme, as outlined above, is retained by the course provider. Failure to do this, and consequent failure to meet the requirements of a designated audit, may result in exclusion from applying to future Springboard calls. Examples of the type of material to be retained includes evidence of a DEASP payment for those in receipt of such payments and a P60 for those in employment.

6.3 ESF Programme for Employability, Inclusion and Learning (PEIL) 2014-2020

Springboard+ is co-funded under the European Social Fund Programme for Employability, Inclusion and Learning (PEIL) 2014-2020. Participation in ESF co-financed programmes necessitates specific requirements with regard both to financial management and controls, participant's data collection and verification of student eligibility.

In addition, participation in ESF co-funded programmes necessitates compliance with ESF communication and publicity requirements. Any material publicising or promoting Springboard+ funded courses (including posters and signage) must explicitly acknowledge ESF co-funding and ESF logos must be incorporated into all Springboard publicity material. Please see <https://www.esf.ie/en/Information-Centre/Communication/> for details.

Further information on ESF is available on the ESF website www.esf.ie

Please note that all approved Providers are subject to audit by the EU and other national bodies (including the DES, the HEA and their designated auditors). It is anticipated that a number of audits will be carried out in 2019. These audits may comprise financial and/or communication and publicity elements. Checks may also be carried out on material retained as part of applicants eligibility for courses.

6.4 Online system for Springboard+ applicants

All Providers of courses funded through Springboard+ will be required to use the online system www.springboardcourses.ie to manage course information, applications and acceptances as well as return of data as set out above.

6.5 Selection process and criteria

Decisions on proposals for funding will be made by a panel of experts with industry and educational experience, supported by the HEA. An independent process auditor will oversee the assessment and selection process.

Course proposals will be assessed in accordance with the criteria set out in Sections 2-5 of the online course proposal form and the associated marking scheme (Appendix 3). As part of the assessment procedure the assessors will have access to information on academic and employment outcomes from the Application Management System (AMS) on courses run in previous years through Springboard+.

It is intended that Springboard+ will support a mix of courses at different NFQ Levels, of varying duration; and having regard to the educational attainment levels of the priority participant groups. The Panel's final recommendation on courses approved will also take into consideration the overall mix of courses by level, type and duration, as well as geographical spread and mode of delivery.

Subject to demand and take-up of individual course places, the HEA may agree to re-allocate unfilled places to other Springboard+ courses.

It is planned that notification of approved courses will be sent to Providers at the end of March

2019. Contracts will be agreed between Providers and the HEA and planning and marketing of courses will begin. Uploading of information by Providers on approved courses to the online system www.springboardcourses.ie will be an important part of this process.

6.6 Freedom of information

Information held by the HEA on Springboard will be subject to the Freedom of Information Act 1997 (FOI Act), which was passed into law on 21st April 1997, The Act has applied to the HEA since the 1 October 2001. Policies and procedures on access to information is set out in the following link: <http://www.heai.ie/en/freedom-of-information>.

7 Submission of proposals

A Frequently Asked Questions (FAQs) document has been prepared to coincide with the Call document and will be circulated to all Providers. Any questions not addressed in this document can be submitted to springboard@hea.ie. The FAQ document will be updated and uploaded to the website on Wednesday each week. The final FAQ will be uploaded on Wednesday 20th February.

- (i) Proposals must be submitted online via <http://skillsdirect.hea.ie/>
- (ii) The closing date for submission of proposals is **13.00hrs on Monday 25th February 2019.**

The online application system will not accept proposals submitted after this deadline.

- (iii) As outlined above any queries on the Call process for 2019 must be emailed to springboard@hea.ie and responses will be updated on the FAQ document. Telephone queries will not be accommodated, and any form of canvassing will disqualify Providers from participation in the initiative.

Indicative* timetable 2019

Call for Proposals issues	Monday 14th January 2019
Deadline for submission of proposals	Monday 25th February 2019, <u>13.00hrs</u>
Providers notified of approved courses	April 2019
Contracts agreed with HEA, Providers upload information for applicants to www.springboardcourses.ie	April 2019
Applications for Springboard+ 2019 open via www.springboardcourses.ie	May 2019

*The HEA will endeavor to adhere to these indicative dates; however, it may prove necessary to amend them as the initiative rolls out. Any changes in the timetable will be notified to prospective course Providers.

Appendix 3

Marking Scheme

Criteria	Marks available
Course description, modules, delivery and other relevant details. Digital skills, transversal skills, management and leadership skills and the workplace of the future should be addressed under this criteria.	40
Course details relating to industry collaboration and support for the course proposal	30
Course details relating to supports for course participants	10
Cost and value for money	20
Total	100

Appendix 4

Regional Skills Fora Managers Statement of Support

TEMPLATE ONE: GENERAL REGIONAL OVERVIEW

Programme Name, Level & Main Modules Covered:	
Industry Sector Targeted:	
Roles Targeted:	
Has this sector been identified as key national skills priority in the EGFSN Reports?	Y/N [Report Title]
Has this sector been identified as key regional priority in your Regional APJ?	Y/N
Has this sector been identified as key regional skills need by the SLMRU?	Y/N
Number employed in this sector in your region [SLMRU data]:	
Established/emerging cluster in your region in this area:	Established/Emerging [select one]
Has your RSF directly engaged in skills needs analysis/development work in this sector	Y/N If Y, template 2 should be completed.

TEMPLATE TWO [ADDED TO TEMPLATE ONE]: REGIONAL SKILLS FORUM DATA

Programme Name, Level & Main Modules Covered:	
Industry Sector Targeted:	
Roles Targeted:	
Is this sector an RSF priority in your region?	Y/N
If not an RSF priority sector, is the RSF aware of additional needs in the proposed area from wider industry engagement?	Y/N
Estimate no. of companies/employees directly engaged by RSF in this sector [via audits, round-tables, Forum sub-groups in the past 24 months etc]	Insert No. of Companies
Has this upskilling area been identified as a priority skills needs by companies in your region through your RSF work?	Y/N
Provide headline summary data/primary evidence/insights on specifics of gaps/needs identified via your RSF work relevant to the proposal:	[e.g. level of skill, type of roles needing this upskilling etc, any data quantifying demand...]
Will this proposal help close the skills gap identified by companies?	Y/N
