## INTRODUCTION

*Higher Education System Performance, Institutional Profiles 2019/20* is the tenth in a series of reports from the Higher Education Authority\*. These profiles, developed in partnership with the Department of Further and Higher Education and the higher education institutions, have proved invaluable in supporting strategic planning at institutional and system levels.

The institutional profiles play an important role in demonstrating the performance of the higher education system to the public and government. The higher education system performance framework, developed in recent years, aims to hold the higher education system accountable for performance and the delivery of national priorities; to monitor performance of the system; and to enable HEIs to identify their strategic niche and mission through the agreement of a performance compact with the Higher Education Authority.

In this regard, the institutional profiles have proved a valuable part of this process, facilitating the monitoring of trends in higher education provision in terms of participation metrics, fields of study, research, knowledge transfer and the financial and human resource base underpinning the system. The HEA and the higher education institutions remain committed to the continued development and refinement of institutional and system performance metrics, particularly as HEA legislation is enacted and a new System Performance Framework is developed.

When comparing institutions, the metrics should be interpreted and understood in light of the mission and vision of an institution and in the context of the broader institutional profile because factors such as the disciplinary mix, the levels and modes of study and the characteristics of the student body are all important in understanding the performance of an institution.

Appendix 1 provides a technical description of the various data sources that are used to create the institutional and system profiles in this publication. Note that in order to maintain confidentiality, student and staff numbers are rounded to the nearest 5 in line with our policy on statistical disclosure.

We would like to thank the higher education institutions profiled in this report for their cooperation in providing the data presented and for the feedback on initial drafts of the 2019/20 profiles. The HEA will continue to lead the development and refinement of these profiles in partnership with the higher education institutions, the Department of Further and Higher Education, Research, Innovation and Science, and other relevant government departments and agencies.

- Revised December 2022, adding Bibliometrics for Dublin City University, Maynooth University, NUI Galway, RCSI, Trinity College Dublin, University College Cork, University College Dublin and University of Limerick.

## **Staff**

### **Core Staff, Contract Research & Specialist Staff**

- Source: Quarterly staff returns, December 2019 as submitted to HEA (WTEs)

Staff numbers are at December 2018. Staff numbers are categorised according to the Employment Control Framework (ECF). The ECF encompasses three broad categories of post, defined according to their nature and their source of funding. Paragraph 1.1 of the ECF includes core staff, i.e., mainstream posts funded from the core grant, undergraduate tuition fees (including grant in lieu of fees), student services charge and the student contribution. Paragraph 1.2 of the ECF 2 includes non-core-funded research and related project posts, including commercialisation posts, funded from exchequer resources external to the institution. Paragraph 1.3 of the ECF includes other research and/or specialist project-based posts funded from non-exchequer sources: EU research and other grants, private sector income, international student income, postgraduate and part-time fees - but not including fulltime EU undergraduate tuition fees/student contributions as non-exchequer, non-core income.
