Observations	42890	42890	42890	42890	42890	42890	42890

Standard errors in parentheses

\*  $p < 0.05$ , \*\*  $p < 0.01$ , \*\*\*  $p < 0.001$

Coefficients show percentage point difference in non-progression compared to the reference category. Calculated using logistic regression models of non-progression and transformed into percentage points using marginal effects in Stata.
