In-Depth: Economics Graduates
2017, 2018 & 2020

GRADUATE OUTCOMES
WHERE TO NEXT?
Why focus on economics graduates?

In the Class of 2017, there were **865 graduates** from economics-related courses. By 2020, this had increased by almost one-third to **1,145 graduates**.

Economics examines how scarce resources should be distributed among its population. Measures such as Gross Domestic Product and Gini-Coefficients are used to measure overall economic activity and fairness within society. National budgets, international trade, inequality, and financial markets are just some issues explored by Economists.

This Info-Byte looks at what happens to Economics graduates in their early careers, where they expect to work, what they can expect to do in their roles and how much they can expect to earn.
What graduates are included?
Graduates included were those whose course was predominantly Economics focused.

This results in a total of 2,935 graduates.

International graduates
Avg. across all courses is 14%

Identify as male
63%

Economics graduates studied at Undergraduate level:
20% as Postgraduate taught programme, and 1% studied postgraduate research

79%

In employment, nine months after graduation (avg. across 3 years). Average levels of employment across survey years is 75.9%
